

## Devin's project management video library

I developed and produced these videos as part of the inbound marketing and Whole Product approach for [ProjectManager.com](https://ProjectManager.com).

Subscribers to the on-line project tracking tool needed to also learn practical project management practices in order to get the most out of ProjectManager.com software. So, the educational content being offered by ProjectManager.com formed part of the Whole Product that their customers needed in order to get full value from the software.

I've curated video topics from the 44 videos I developed that are applicable to situations faced by business and team leaders when building a company.
